

# My Tools for doing Freezing Soap Bubble Photography

Bubble Mixture

Straws

Cup or other platform to blow bubbles onto

Background if natural scenery isn't good enough to create pleasing bokeh. I made mine out of matte board so that it can stand up. I put some black material on it to start with but added the photo after the fact. You can use any kind of photo you want. What I first saw done used an aurora photo that looked pretty impressive.

Made it so that it stands up on its own.

Any Tripod will work.

I also used a remote shutter release and an LED light setup if needed to enhance the looks of bubbles made. Gives them more contrast. Also used my cable release.

Used my Nikon camera with macro lens. Working in cold area to do the frozen bubbles so remember to store your camera in a bag to slowly acclimate back to warmer temp inside.
